Carron Lodge

Carron Lodge is a family run business that prides itself in building strong relationships with our suppliers.

We produce over 30 varieties of cheese, using milk from our own farm, including our own herd of water buffalo. All our cheese are pasteurised, heating the milk to 72.5°C, to ensure that harmful bacteria are destroyed. The milk is then cooled in the open vats to 32°C, where starter cultures and rennet are added. We only use vegetarian rennet in our cheese. To further complement our manufacturing site cheese can be matured in our man-made cave, embellishing the flavours and authenticity of the cheese we produce.
